

Logicalis is an international provider of integrated information and communications technology.

What we do

Logicalis enables organisations to gain greater business value from their IT investment.

We do this by providing secure network, storage and compute solutions based on VMware, Cisco and EMC technology. Our solutions enable customers to:

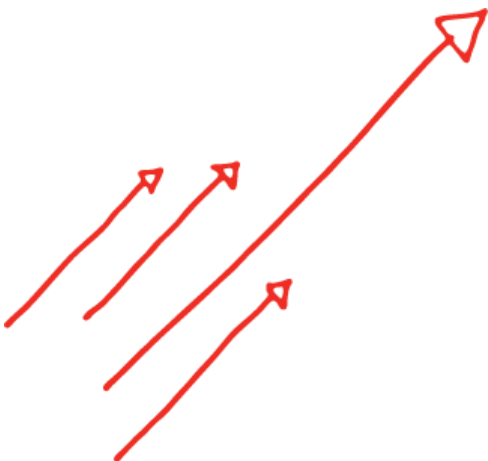

- minimize risk
- improve application delivery
- enhance productivity through Unified Communications
- reduce costs through consolidation and virtualization
- drive innovation by migrating to a cloud computing delivery model for IT.

Corporate Overview

- Presence across Asia-Pacific, with local offices Sydney, Melbourne and Brisbane
- Part of the Logicalis Group, an international provider of integrated information and communications technology (ICT) solutions and services
- Headquartered in the UK, Logicalis Group employs over 1,900 people worldwide and has revenues of over £1bn.

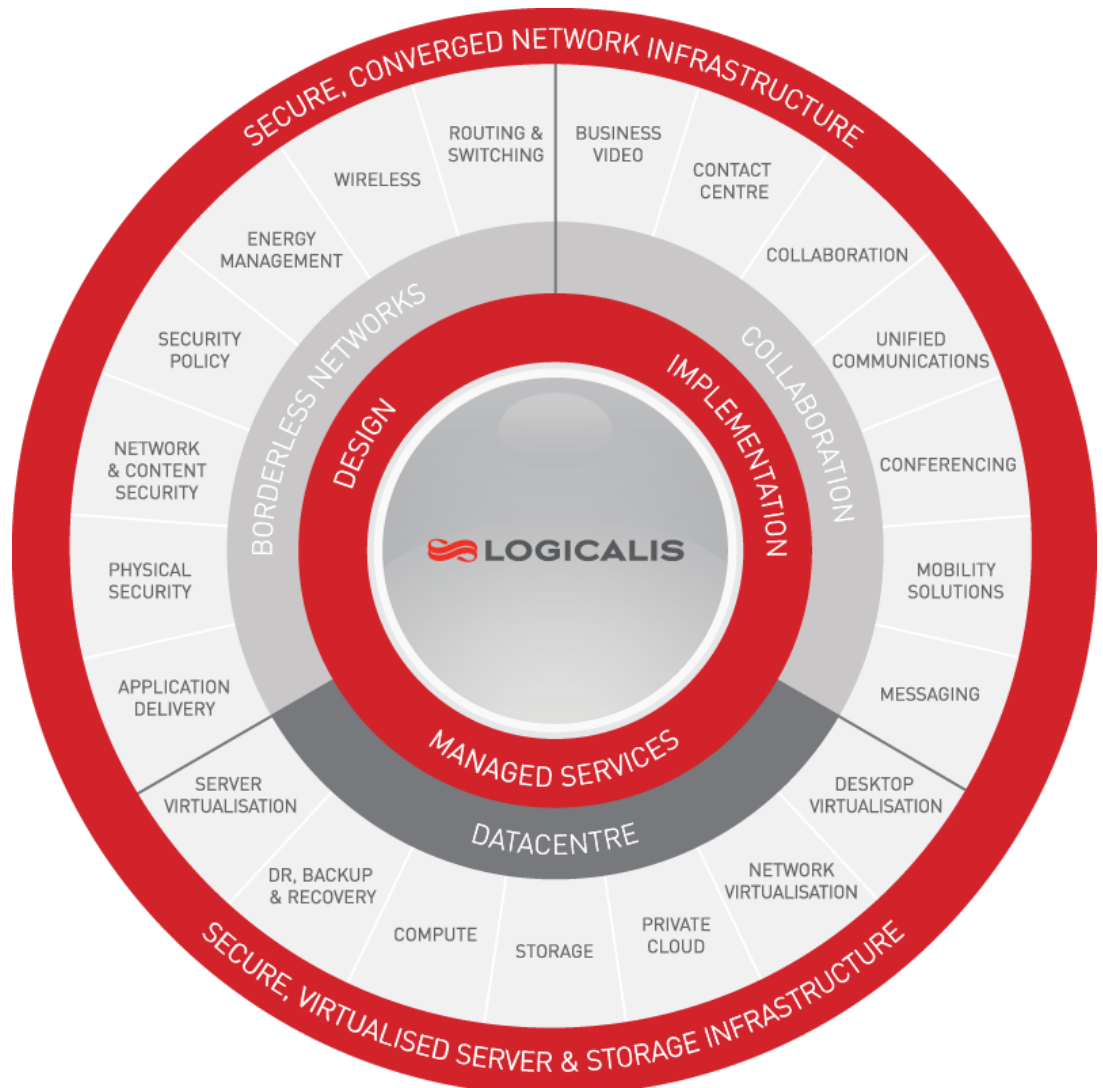

Logicalis Partners

- Cisco Gold Partner for over 12 years, with accreditations across networking, Unified Communications and Data Centre. First partner in Australia to be accredited under the Managed Services Channel Program.
- EMC Premier Partner
- VMware Enterprise Partner
- First Vblock certified partner in Australia.

Capabilities

- **Services:** As companies compete to serve customers faster and respond more quickly to change, they are being asked to deliver secure, instantaneous, and transparent service with technology that grows more complex every day. Logicalis services are designed to help customers accomplish this, from planning and implementation to managed services that reduce costs and improve operational efficiency.
- **Borderless Networks:** A transformation in the workplace is driving competitive advantage, enabling employees to communicate and work with anyone, anywhere, on any device. Logicalis takes an architectural approach to designing and delivering networks that support improved workplace productivity.
- **Collaboration and Video:** Logicalis has delivered some of the largest Unified Communications deployments in Australia, enabling customers to deliver a better customer experience and accelerate productivity through video-conferencing and collaboration technologies.
- **Data Centre:** Where traditionally 70% of IT of budget went towards "keeping the lights on", the economics of the data centre is changing. Consolidation, virtualization and automation is transforming the way in which information and services are consumed. Logicalis is closely aligned with Cisco, EMC and VMware to deliver and manage "VCE" based Data Centre solution, and assist customers with developing a roadmap to private cloud computing.
