LOGICALIS
Architects of Change

Secure Operations Centre (SOC)

Our specialised security team deliver round-the-clock protection, actively preventing threats and responding instantly to incidents, ensuring your operations remain seamless and protected.

The outcome? Unmatched security resilience, every minute of every day, all year round.

The Logicalis SOC at a glance

Imagine having a dedicated team of cybersecurity experts safeguarding your organisation around the clock.

Specialist SOC expertise

A critical feature of Logicalis' SOC is our people. Possessing the expertise to analyse threats, respond to incidents, and implement security measures effectively.

Their intellect, intuition and knowledge of the latest cybersecurity trends, tools, and best practices is essential for maintaining a proactive security posture.

Cutting-edge cyber security technology

Logicalis' SOC leads in utilising the latest cybersecurity technology. Advanced analytics, machine learning, AI-driven automation and state-of-the-art MXDR services come together to deliver quicker threat detection, sharper intelligence, faster actions and adaptation to new emerging threats.

As cyber threats grow, the future isn't just about keeping pace—it's about staying steps ahead.

Security process automation

Our security automation tools take standard operating procedures and turn them into digital playbooks and workflows that accelerate our threat investigation, hunting, containment and resolution, completing processes swiftly and consistently.

With automation at work, our security specialists can focus on the priorities that crucially require human intelligence.

> We don't just respond to alerts - we actively manage customer security, optimising platforms for today and tomorrow. In a rapidly evolving cyber world, standing still is not an option. Our proactive services hunt for anomalies that could signal compromise, even in the absence of clear indicators.'

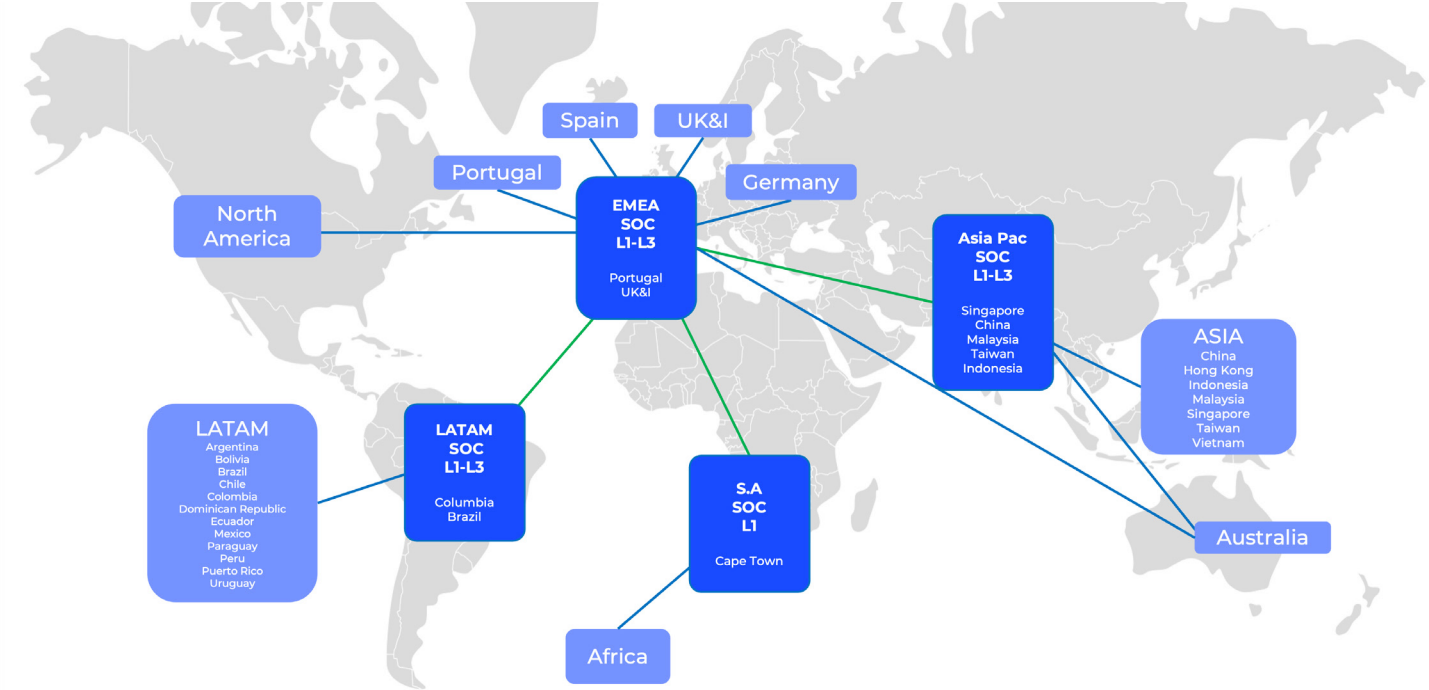
James Hampson, Director Managed Security Services

Logicalis SOC capabilities

- Continuous monitoring and analysis
- Incident detection and response
- Threat intelligence gathering and analysis
- Threat Hunting
- Vulnerability management
- Compliance monitoring and reporting

Global footprint

Our Logicalis SOCs are situated in four major hubs: LATAM, EMEA, SA, and ASIA PAC and supported by nine office locations worldwide. Each region has resiliency built in, at least x2 office locations.



Highlights

Four regional SOC hubs provide continuous monitoring, share global threat intelligence, and enhance resilience

Over 214 global cybersecurity experts

Common operating model

- Tier 1 - 24x7 monitoring, investigation and triage
- Tier 2 - Incident Handlers
- Tier 3 - Proactive Hunters
- Security SDM
  Security SDA

Global MXDR provider

Leverage the latest XDR technologies as a managed service. Logicalis offer technology from multiple partners and are the only business able to offer Cisco XDR globally as a service.

Logicalis security IP

Take advantage of our Logicalis Global Threat Intelligence IP generated from all the SOCs combined data.

This intelligence fuels the Logicalis SOAR playbooks designed to help analysts defend at machine speed.

> We generate about 170,000,000 events a month. There is no way our internal security team would be able to review that amount of data without partners and their threat intelligence to help indentify potential threats.
>
> Global CISO, UKI Enterprise Organisation

Benefits of outsourcing your security to the Logicalis SOC

- Access to a team of highly skilled security experts
- Bridge the IT security skills gap
- Assistance with security training
- Reduce the cost and burden of purchasing technology and hiring staff
- Seamlessly integrate cutting-edge security tools and methodologies into your environment
- Gain access to global threat intelligence
- Ensure 24/7 proactive monitoring and response
- Maintain centralised response and accountability

> Technologies are constantly evolving, making it challenging for companies to keep pace and hire all the necessary operational staff for comprehensive security protection. Utilising a SOC service allows businesses to outsource their operations to specialists who manage security tools and address threats on a daily basis.

Artur Martins, CISO Logicalis Portugal

With Logicalis as a strategic security partner, organisations gain the tools and expertise needed to protect their business, assets, and customers effectively.
